**RECUT  
GRO**

PRO GRO SERIES RTU

## BOOSTING REGROWTH FOR BETTER FEED QUALITY

*After a silage or hay cut, paddocks lose vital nutrients, slowing regrowth and lowering feed quality. **RECUTGRO™** is a ready-to-use liquid fertiliser, delivering nitrogen, potassium, and phosphorus for rapid pasture recovery.*

As well as growing more grass, **RECUTGRO™** improves pasture quality for the next grazing or harvest.

**RECUTGRO™** is designed to accelerate regrowth and restore nutrient balance after cutting.

Applied at 20L/ha, it delivers a high potassium boost plus balanced N and P to drive fast leaf recovery and restore feed value.

**PROVEN  
SCIENCE  
REAL  
RESULTS**

### KEY FEATURES:

- Accelerates pasture recovery after cutting
- High potassium for rapid regrowth and leaf expansion
- Balanced NPK for metabolic and structural needs
- Foliar application = fast uptake and response
- RTU formulation for simple, accurate use

# NO COMPLEX BLENDING NO WASTED NUTRIENTS

## TARGET CUSTOMERS:

- Dairy farmers maximising post-cut pasture growth
- Sheep & beef producers needing quick paddock recovery
- Contractors managing silage and hay programs
- Mixed farming systems with rotational pasture

## BIOACTIVE PACKAGE:

Kelp extracts delivering natural growth hormones to stimulate root and shoot regrowth, improving resilience and recovery speed.

## KEY BENEFITS

- **Fast Recovery:** Nutrients supplied quickly for rapid regrowth
- **Boosts Leaf Development:** Potassium drives canopy closure
- **Restores Nutrient Balance:** Replenishes what's lost at cutting
- **Improves Pasture Quality:** Supports feed profile for next use
- **Simple to Apply:** RTU formulation for consistency

## SUPPORTING SCIENCE - WHY LIQUIDS WORK POST-CUT

- **Rapid Response:** Foliar N, P, and K absorbed immediately
- **Better Efficiency:** Lower nutrient volumes for same effect
- **No Soil Lock-Up:** Nutrients bypass fixation after heavy removal
- **Visible Results:** Pasture regrowth and feed quality restored faster

**THE SMARTER,  
FASTER, CLEANER  
FERTILISER FOR  
YOUR FARM**

### TYPICAL ANALYSIS %w/v

N	P	K	S
8	6	13	0

### INGREDIENTS:

Urea, Phosphorus, Potassium,  
Activated Kelp

### DIRECTIONS FOR USE

#### Usage:

7 - 10 days post-cut once covers  
return to 1500 - 1600 KgDM/ha

Apply 20L/ha with 130L water  
minimum (150L total recommended)

#### Best used:

- To accelerate regrowth and restore nutrient balance
- Ahead of the next grazing or harvest cycle

#### Compatibility:

- Suitable for use with spray programs
- Can be tank-mixed with crop protection products

### PACK SIZE:

200L | 1000L
